The Complex Causes of Famine

Overview
What is famine and why do famines happen? Using class discussion, a radio story, and an interactive timeline, students will investigate the complex causes of famines, both in modern times and throughout history.

Objectives
- Students will be able to define famine.
- Students will explore some of the different factors that either contribute to the severity of famines or mitigate them.
- Students will learn about different famines throughout history and discuss the similarities and differences in the causes.

Prior Knowledge
None.

Teaching Tips/ Activity Sequence
1. Activate students’ prior knowledge and introduce the activity by asking the class, “What is famine?” Seek consensus among students to reach a final definition such as “an extreme scarcity of food.” (Merriam-Webster definition). Then ask, “What are the causes of famine?” and collect students’ answers. Keep these for the wrap-up discussion.
2. Allow students to work alone, in small groups, or pairs to complete The Complex Causes of Famine handout. Students may choose famines to research, or you can assign different famines to different groups.
3. Gather the group for a final discussion about the causes of famine. Allow groups to summarize what they learned about a particular famine in history. Make a chart on the board and collect data from the groups about the time, location and causes of various famines. (A master chart of famines from the timeline is available below).
   - Post and refer to a world map to help students better understand where the famines happened.
The Complex Causes of Famine

Teacher Notes

- Compare the chart to the students’ initial thoughts about the causes of famine.

4. Encourage students to discuss the similarities and differences between the different famines. Consider asking the following questions.

- Throughout history, what seem to be the most common causes of famine?
- Are the causes of famine in modern history (1900 – present day) different than those of the 1800s and earlier?
- What is the role of governments in causing famine to occur? What role do they have in preventing or dealing with famine?
- What roles do individuals have in preventing or dealing with famine?
- Is famine preventable?

Extensions

- Have students research aid agencies and organizations that fight famine and report back to the class about how and where the organization works. Another lesson, Why Are People Hungry? is available at http://www.ricediversity.org/foodfor9billion/.

Standards

National Science Education Standards
Grades 9-12
Science in Personal and Social Perspectives
Population Growth 2.3
Environmental quality 4.1, 4.3
Science and Technology in local, national, and global challenges 6.2

Common Core State Standards for Literacy in History / Social Studies, Science and Technical Subjects 6-12
Reading Standards
Key Ideas and Details RST1, RH1
Integration of Knowledge and Ideas RST7
Writing Standards
Text Types and Purposes WHST2
Production and Distribution of Writing WHST4
Range of Writing WHST10

National Curriculum Standards for Social Studies
3. People, Places, and Environments
5. Individuals, Groups, and Institutions
7. Production, Distribution, and Consumption
9. Global Connections

National Geography Standards
2. Knows the location of places, geographic features, and patterns of the environment
9. Understands the nature, distribution and migration of human populations on Earth’s surface
18. Understands global development and environmental issues

## Causes of Famines throughout History

**Note:** This list includes only the famines on “Timeline: Food through the ages.” For a more extensive list of famines throughout history, please consult the Resources section of the teacher notes.

<table>
<thead>
<tr>
<th>Name of Famine</th>
<th>Years</th>
<th>Location</th>
<th>Causes</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Great Famine</td>
<td>1350-1332</td>
<td>Northern Europe</td>
<td>Cold winters &amp; torrential summer rains lead to crop failures, kill farm animals. Food prices rise.</td>
<td>Cannibalism, disease, crime and warfare.</td>
</tr>
<tr>
<td>Irish Potato Famine</td>
<td>1846-1847</td>
<td>Ireland</td>
<td>Late blight disease leads to potato crop failures. Potatoes are a staple crop for the large numbers of poor people. Debt and high poverty rates contribute.</td>
<td>Mass starvation &amp; disease. 1 million die; 1.5 million emigrate.</td>
</tr>
<tr>
<td>Soviet Famine</td>
<td>1932-1934</td>
<td>Ukraine</td>
<td>Stalin’s collectivization of agriculture and transfer of millions of tons of grain from Ukraine to Russia leads to national famine.</td>
<td>7-8 million people die.</td>
</tr>
<tr>
<td>Great Bengal Famine</td>
<td>1943 - 1944</td>
<td>Eastern India</td>
<td>During WW II, British government took rice from India to send to British troops. Rice yields were not significantly lower than other years. People in rural India cannot afford food.</td>
<td>2.1 – 3 million people die.</td>
</tr>
<tr>
<td>Bangladesh Famine</td>
<td>1974</td>
<td>Bangladesh</td>
<td>Triggered by floods, but caused mainly by market failure and inadequate food distribution. US withholds aid for political reasons, local traders hoard food needed by poor.</td>
<td>1.5 million die; Landless laborers most severely affected.</td>
</tr>
<tr>
<td>Cambodia Famine</td>
<td>1975-1978</td>
<td>Cambodia</td>
<td>After five years of civil war, communist Khmer Rouge party takes over. Forced collective farming reduces output.</td>
<td>Estimated 1.5 - 2 million die from starvation, torture, and execution.</td>
</tr>
<tr>
<td>North Korean Famine</td>
<td>1995-1999</td>
<td>North Korea</td>
<td>Decline in food, fuel and fertilizer shipments from China and Russia combine with flooding, drought, and poor production from state farms. International aid slow to arrive and poorly distributed.</td>
<td>Estimated 2.8 - 3.5 million die.</td>
</tr>
<tr>
<td>Global Food Security Crisis</td>
<td>2007-2008</td>
<td>various</td>
<td>Spike in food prices caused by speculation in commodity markets, rise in oil and fertilizer prices, use of corn in fuel production, poor harvests in some places, and increasing demand.</td>
<td>Food riots in many countries.</td>
</tr>

The Complex Causes of Famine

What is famine and why does it happen? Is famine simply caused by drought, a long period with low precipitation? Or is there more to famine?

Your task is to investigate the different reasons that famines, or extreme shortages of food, happen. You will listen to a radio report and then use an interactive timeline to learn more about famines throughout history.

Part 1: Listen, Think and Learn

Listen to the radio report and look at the pictures available. The text of the story is also available. As you listen, answer the questions below.

1. The radio story examines famine in what two countries? What continent are they on?

2. In which country have the people been much more affected by famine? What have many of those people done to try to escape the famine?

3. According to the report, what are the causes of the famine and death from malnutrition in Somalia?

4. What is the impact of international food aid on local movements or authorities?

5. In the 1980s, people in Ethiopia suffered a drought and famine similar to Somalia in 2011. However, even though the 2011 drought impacts Ethiopia, but the people are not suffering from famine. Why not?
Part 2: Famines over time

Famines aren’t unique to Africa. They have happened all over the world at different points in human history. Let’s take a look at why different famines have happened. Load the timeline at http://cironline.org/reports/timeline-food-through-ages. Note that the timeline follows five strands over time: Agriculture (green row), Demographics (red row), Health and Nutrition (blue row), Hunger (black row) and Politics (brown row). See that black bar with dates at the bottom? The bright green rectangle indicates the period of time that is shown on the 5 rows at the top.

Scroll through the timeline and find the two famines that have been assigned to you. Learn more about the famines by clicking on “More” on the box that appears on the timeline. Be prepared to share your information with the class.

6. Summarize what you have learned about the causes of the two famines you researched.

Return to the large group and share what you have learned. Listen to what your classmates offer.

7. Based upon what you have learned in this activity, is famine preventable? Why or why not?
The Complex Causes of Famine

What is famine and why does it happen? Is famine simply caused by drought, a long period with low precipitation? Or is there more to famine?

Your task is to investigate the different reasons that famines, or extreme shortages of food, happen. You will listen to a radio report and then use an interactive timeline to learn more about famines throughout history.

Part 1: Listen, Think and Learn

Listen to the radio report and look at the pictures available. The text of the story is also available. As you listen, answer the questions below.

1. The radio story examines famine in what two countries? What continent are they on?
   Ethiopia and Somalia are both countries in eastern Africa.

2. In which country have the people been much more affected by famine? What have many of those people done to try to escape the famine?
   People in Somalia have been severely affected by famine. Many of them have walked to refugee camps in Kenya.

3. According to the report, what are the causes of the famine and death from malnutrition in Somalia?
   There is a drought. (There are extreme droughts in other countries too.) But there are also “political complications,” including the lack of a central government, “meddling” from outside countries, and an extremist group that blocks foreign food aid and takes food from the people.

4. What is the impact of international food aid on local movements or authorities?
   International food aid can sometimes undermine the authority or reduce the popularity of local movements. For example, Al Qaeda’s popularity decreased in Pakistan after the US provided food to earthquake victims.

5. In the 1980s, people in Ethiopia suffered a drought and famine similar to Somalia in 2011. However, even though the 2011 drought impacts Ethiopia, but the people are not suffering from famine. Why not?
   Ethiopia has built a safety net or “shock absorbers” for droughts. These include storing water and grain for emergencies, providing better seeds to farmers, providing crop insurance for when crops fail and building roads to help bring products to market. They also try to increase individuals’ incomes.

6. Summarize what you have learned about the causes of the two famines you researched.
   *Student answers will vary.*

Return to the large group and share what you have learned. Listen to what your classmates offer.

7. Based upon what you have learned in this activity, is famine preventable? Why or why not?
   *Student answers will vary, but should include political/economic reasons in addition to extreme weather conditions/natural disasters/crop diseases.*
